EXPERIENCE

Motivus 🌐

Aug 2021 — Apr 2025

Associate Developer Java, Spring Boot, JPA, IntelliJ, Git, Trello

Remote Work

- Led a team of 10 developers as both a Scrum Master and Java Developer, arranging our deliverables in Trello.
- Added entities using JPA and provided maintenance to the backend of a recruit assessment platform.
- Became the primary contributor to the Java Git repository, pitching in 60% of total new lines of code.
- Received access to Udemey courses (in use!) for consecutive years of high performance (Rating: 4 — Exceeds Expectations.)
- Joined a production incident team in Citibanamex via the contracting firm Motivus.

Banca Empresarial Citibanamex (Contractor) 🌐

Dec 2021 — Feb 2025

Associate QA Developer Java, Spring Boot, JDBC, IntelliJ, Git

Remote Work

- Supervised the release of 231 Java microservice updates by 32 development teams during the span of one year.
- Learned the functionality 91 Spring Boot microservices across 5 environments and 6 gateways.
- Verified the JDBC communication between microservices and their SQL/NoSQL databases using 61 query scripts.
- Analyzed 6 Java production incidents by tracing encrypted logs across microservices.
- Occasionally pair programmed to find the reasons behind the discrepancies in error formatting.
- Occasionally browsed through Git commits to find the line of code that reintegrated an already fixed bug.
- Trained and mentored a new hire for the role throughout 4 months whilst keeping up with deliverables.
- Kept up with deliverables for the duration of 6 months when the team shrunk down from 4 members to 1.
- Further studied Java development with the Java 17 Masterclass udemey course.

EDUCATION

Instituto Tecnológico de Estudios Superiores de Monterrey (ITESM PUE) 🌐🌐

Professional License in Computer Science and Technology Engineering Java, Git

- Made use of Java by creating a contacts interface for the Object-Oriented Programming course.
- Made use of Java by creating a calendar interface for the Systems Design course.
- Made use of Git in most programming projects (unlisted due to the use of other programming languages).

CERTIFICATES

Learn Programming Academy 🌐🌐

Java 17 Masterclass — 44% done (232/522 lessons) Java, IntelliJ, Git, JShell

- Solved 49 algorithms in Java requiring principles such as Composition, Encapsulation, Polymorphism, Abstraction, Interfaces.
- Created 65 IntelliJ projects, applying principles such as Overloading, Inheritance, Factories, VarArgs, Generics, Nested Classes.
- Applied code syntax suggestions from the course instructor and are currently learning coding best practices.

Test Automation University 🌐🌐

Java API Path — 100% done (128/128 lessons) Java, IntelliJ, JUnit5, Git

- Created 18 IntelliJ projects implementing unit tests with JUnit5.
- See the full list of badges (mixed with Java Web UI Path) here. [🔗](#)

Test Automation University 🌐🌐

Java Web UI Path — 100% done (164/164 lessons) Java, IntelliJ, Cucumber, Git

- Created 6 IntelliJ projects implementing feature tests with Cucumber.
- See the full list of badges (mixed with Java API Path) here. [🔗](#)

SKILLS

| | |
|-------------|--|
| Languages | Advanced English, Native Spanish |
| Concepts | Object-Oriented Programming, Microservice Architecture, Fullstack Development, Databases |
| Principles | Abstraction, Big O Notation, Generics, Inheritance, Nested Classes, Polymorphism, Scope, VarArgs, Wrappers |
| Development | Java, Spring Boot, JDBC, Git, Version Control, Linux Terminal, Debugging |
| Environment | Linux, IntelliJ, VSCode, GitHub, TectiaSSH |
