EXPERIENCE

Motivus ⊕ | **Aug 2021 — Apr 2025**
Associate Developer Java, Javascript, Typescript, Spring Boot, JPA, Angular, IntelliJ, Git, Trello | Remote Work

- Led a team of 10 developers as both a Scrum Master and Fullstack Developer, arranging our deliverables in Trello.
- Added features and provided maintenance to the backend and frontend of a recruit assessment platform.
- Added the ability to query for users, groups, universities, and scores in the database using JPA.
- Added views for users, users by group, score graphs by group, search, among others in Angular.
- Became the primary contributor to the Java Git repository, pitching in 60% of total new lines of code.
- Received access to Udemy courses (in use!) for consecutive years of high performance (Rating: 4 — Exceeds Expectations.)
- Joined a production incident team in Citibanamex via the contracting firm Motivus.

Banca Empresarial Citibanamex (Contractor) ⊕ | **Dec 2021 — Feb 2025**
Associate QA Developer Java, Spring Boot, JDBC, IntelliJ, Git | Remote Work

- Supervised the release of 231 Java microservice updates by 32 development teams during the span of one year.
- Learned the functionality 91 Spring Boot microservices across 5 environments and 6 gateways.
- Verified the JDBC communication between microservices and their SQL/NoSQL databases using 61 query scripts.
- Analyzed 6 Java production incidents by tracing encrypted logs across microservices.
- Occasionally pair programmed to find the reasons behind the discrepancies in error formatting.
- Occasionally browsed through Git commits to find the line of code that reintegrated an already fixed bug.
- Trained and mentored a new hire for the role throughout 4 months whilst keeping up with deliverables.
- Kept up with deliverables for the duration of 6 months when the team shrunk down from 4 members to 1.
- Further studied Java development with the Java 17 Masterclass udemy course.

EDUCATION

Instituto Tecnológico de Estudios Superiores de Monterrey (ITESM PUE) ⊕ ✔
Professional License in Computer Science and Technology Engineering Java, Javascript, Typescript, Angular, HTML, CSS, Git

- Made use of Java by creating a contacts interface for the Object-Oriented Programming course.
- Made use of Java by creating a calendar interface for the Systems Design course.
- Made use of Angular by creating an online learning platform with certifications for the Web Applications Development course.
- Made use of Angular by creating an e-commerce platform with shopping cart and billing for the Software Architecture course.
- Made use of Git in most programming projects (unlisted due to the use of other programming languages).

CERTIFICATES

Learn Programming Academy ⊕ ○
Java 17 Masterclass — 44% done (232/522 lessons) Java, IntelliJ, Git, JShell

- Solved 49 algorithms in Java requiring principles such as Composition, Encapsulation, Polymorphism, Abstraction, Interfaces.
- Created 65 IntelliJ projects, applying principles such as Overloading, Inheritance, Factories, VarArgs, Generics, Nested Classes.
- Applied code syntax suggestions from the course instructor and are currently learning coding best practices.

freeCodeCamp ⊕ ✔
Responsive Web Design — 100% done (321/321 lessons) HTML, CSS, Git

- Created the following responsive websites as part of the coursework;
- Tribute page, survey form, product landing, technical documentation, personal portfolio.

Test Automation University ⊕ ✔
Java API Path + Java Web UI Path — 100% done (292/292 lessons) Java, IntelliJ, JUnit5, Cucumber, Git

- Created 18 IntelliJ projects implementing unit tests with JUnit5.
- Created 6 IntelliJ projects implementing feature tests with Cucumber.
- See the full list of badges here. ↗

SKILLS

Languages	Advanced English, Native Spanish
Concepts	Fullstack Development, Microservice Architecture, Object-Oriented Programming, Databases
Principles	Abstraction, Big O Notation, Generics, Inheritance, Nested Classes, Polymorphism, Scope, VarArgs, Wrappers
Principles	Modules, Suscriptions, Routes, Params, Snapshot Changes, Property Binding, Publisher / Subscriber
Development	Java, Javascript, Typescript, Spring Boot, JDBC, Angular, Git
Environment	Version Control, Linux Terminal, Linux, Debugging, IntelliJ, VSCode, GitHub, TectiaSSH
