EXPERIENCE

Motivus 🌐

Aug 2021 — Apr 2025

Associate Developer Java, Spring Boot, Hibernate, JPA, Git, IntelliJ

Remote Work

- Led a team of 10 developers as both a Scrum Master and Backend Developer for a recruit assessment platform.
- Added the ability to query for recruit's universities, groups, exams, scores and contact information in the database using JPA.
- Served data for the views of users, users by group, dynamic score graphs by group, user search, among others.
- Supervised the changes in the GitHub version control repository for our backend and frontend team.
- Participated in a git rebase to fix the conflicts between multiple team's development branches.
- Became the primary contributor to the Java Git repository, pitching in 60% of total new lines of code.
- Received access to Udemey courses (in use!) for consecutive years of high performance (Rating: 4 — Exceeds Expectations.)
- Joined a production incident team in Citibanamex via the contracting firm Motivus.

Banca Empresarial Citibanamex (Contractor) 🌐

Dec 2021 — Feb 2025

Associate QA Developer Java, Spring Boot, JDBC, Git, IntelliJ, TectiaSSH

Remote Work

- Supervised the release of 231 Java microservice updates by 32 development teams during the span of one year.
- Learned the functionality 91 Spring Boot microservices across 5 environments and 6 gateways.
- Verified the JDBC communication between microservices and their SQL/NoSQL databases using 61 query scripts.
- Analyzed 6 Java production incidents by tracing encrypted logs across microservices.
- Occasionally pair programmed to find the reasons behind the discrepancies in error formatting.
- Occasionally browsed through Git commits to find the line of code that reintegrated an already fixed bug.
- Occasionally connected via SSH to a Linux Server in order to update configuration files and run bash scripts.

EDUCATION

Instituto Tecnológico de Estudios Superiores de Monterrey (ITESM PUE) 🌐🌐

Professional License in Computer Science and Technology Engineering Java, Spring Core, Initializr, Swing, Linux, Git, IntelliJ, VSCode

- Started using Linux in 2018 and have been using it ever since (Ubuntu, Mint, Kali, Arch, Manjaro, Fedora).
- Made use of Java by creating a two-player reversi game in Swing for the Computer Science and Technology course.
- Made use of Java by creating a contact information application in Swing for the Object-Oriented Programming course.
- Made use of Spring Core by using the Initializr by creating project skeletons for the Analysis and Modeling of Systems course.
- Made use of Git in most programming projects (unlisted due to the use of other programming languages).

CERTIFICATES

Learn Programming Academy 🌐🌐

Java 17 Masterclass (284/522 lessons) Java, Git, IntelliJ, JShell

- Solved 49 algorithms in Java requiring object-oriented principles; Abstraction, Encapsulation, Inheritance, Polymorphism.
- Created 78 IntelliJ projects, applying techniques such as Anonymous Classes, Generics, Lambda, Overloading, Overriding, VarArgs.
- Applied code syntax suggestions from the course instructor and are currently learning coding best practices.

Test Automation University 🌐🌐

Java API Path + Java Web UI Path (292/292 lessons) Java, JUnit, Cucumber, Git, IntelliJ

- Created 18 IntelliJ projects implementing unit tests with JUnit5.
- Created 6 IntelliJ projects implementing feature tests with Cucumber.
- See the full list of badges here. 📄

SKILLS

Languages	Advanced English, Native Spanish
Development	Java, Spring Boot, Hibernate, JPA, JDBC, Spring Core, Spring Initializr, Git Linux (Fedora Linux), IntelliJ, VSCode, GitHub, Bitbucket, TectiaSSH
Concepts	Backend Development, Object-Oriented Programming, Design Patterns, Version Control, Microservices, Databases Gang of Four, SOLID, ACID, DDD, MVC, ORM, IoC, DI, CI/CD, JVM, JRE
Principles	Anonymous Classes, Abstraction, Big O Notation, Collections, Declarative Operations, Encapsulation Exceptions, Functional Interfaces, Generics, hashCode, HashMap, Inheritance, Immutability Lambda Expressions, Method References, Polymorphism, Scope, Streams, Unit Tests, VarArgs, Wrappers
