EXPERIENCE

Motivus 🌐

Aug 2021 — Apr 2025

Associate Developer Java, Spring Boot, Hibernate, JPA, Javascript, Typescript, Angular, Git, IntelliJ, VSCode

Remote Work

- Led a team of 10 developers as both a Scrum Master and Fullstack Developer providing maintenance to a recruit assessment platform.
- Added the ability to query for recruit's universities, groups, exams, scores and contact information in the database using JPA.
- Created new views for users, users by group, dynamic score graphs by group, user search, among others in Angular.
- Supervised the changes in the GitHub version control repository for our backend and frontend team.
- Participated in a git rebase to fix the conflicts between multiple team's development branches.
- Became the primary contributor to the Java Git repository, by pitching in 60% of total new lines of code.
- Received access to Udemey courses (in use!) for consecutive years of high performance (Rating: 4 — Exceeds Expectations.)
- Joined a production incident team in Citibanamex via the contracting firm Motivus.

Banca Empresarial Citibanamex (Contractor) 🌐

Dec 2021 — Feb 2025

Associate QA Developer Java, Spring Boot, JDBC, Git, IntelliJ, TectiaSSH

Remote Work

- Supervised the release of 231 Java microservice updates by 32 development teams during the span of one year.
- Learned the functionality 91 Spring Boot microservices across 5 environments and 6 gateways.
- Verified the JDBC communication between microservices and their SQL/NoSQL databases using 61 query scripts.
- Analyzed 6 Java production incidents by tracing encrypted logs across microservices.
- Occasionally pair programmed to find the reasons behind the discrepancies in error formatting.
- Occasionally browsed through Git commits to find the line of code that reintegrated an already fixed bug.
- Occasionally connected via SSH to a Linux Server in order to update configuration files and run bash scripts.

EDUCATION

Instituto Tecnológico de Estudios Superiores de Monterrey (ITESM PUE) 🌐🌐

Professional License in Computer Science and Technology Engineering Java, Jscript, Tscript, Angular, React, Git, IntelliJ, VSCode

- Made use of Java by creating a two-player reversi game in Swing for the Computer Science and Technology course.
- Made use of Java by creating a contact information application in Swing for the Object-Oriented Programming course.
- Made use of Javascript by creating an e-commerce platform with shopping cart in Angular for the Software Architecture course.
- Made use of Javascript by creating an online learning platform in React for the Web Applications Development course.
- Made use of Git in most programming projects (unlisted due to the use of other programming languages).

CERTIFICATES

Learn Programming Academy 🌐🌐

Java 17 Masterclass (284/522 lessons) Java, Git, IntelliJ, JShell

- Solved 49 algorithms in Java requiring principles such as Composition, Encapsulation, Polymorphism, Abstraction, Interfaces.
- Created 78 IntelliJ projects, applying principles such as Overloading, Inheritance, Factories, VarArgs, Generics, Nested Classes.
- Applied code syntax suggestions from the course instructor and are currently learning coding best practices.

freeCodeCamp 🌐🌐

Responsive Web Design (321/321 lessons) HTML, CSS, Git, VSCode

- Created the following responsive websites as part of the coursework;
- Tribute page, survey form, product landing, technical documentation, personal portfolio.

Test Automation University 🌐🌐

Java API Path + Java Web UI Path (292/292 lessons) Java, JUnit, Cucumber, Git, IntelliJ

- Created 18 IntelliJ projects implementing unit tests with JUnit5.
- Created 6 IntelliJ projects implementing feature tests with Cucumber.
- See the full list of badges here. 🔗

SKILLS

Languages Advanced English, Native Spanish

Concepts Fullstack Development, Object-Oriented Programming, Design Patterns, Version Control, Microservices, Databases
Gang of Four, SOLID, ACID, DDD, MVC, ORM, IoC, DI, CI/CD, JVM, JRE

Development Java, Spring Boot, Hibernate, JPA, JDBC, Javascript, Typescript, Angular, React, Git
Linux (Fedora Linux), IntelliJ, VSCode, GitHub, Bitbucket, TectiaSSH

Principles Abstraction, Big O Notation, Collections, Declarative Operations, Encapsulation, Exceptions, Functional Interfaces
Generics, Inheritance, Method References, Anonymous Classes, Polymorphism, Scope, Streams, VarArgs, Wrappers
Modules, Subscriptions, Routes, Params, Snapshot Changes, Property Binding, Publisher / Subscriber
