## EXPERIENCE

### SimplePractice 🌐

Associate Software Engineer JavaScript, Ruby on Rails, Ember, Glimmer, ActiveAdmin, Git, Cursor

Jun 2025 - Present

Hybrid (Puebla <> CDMX)

- Worked on the integration of Decagon customer support widget, resulting in a 85% deflection rate for a monthly savings total of \$460,408 USD based on \$8 USD savings per deflected conversation.
- Worked on the integration of Persona identity verification software, allowing for a 3 months early cancellation of company contract with Kount, for a savings total of \$46,140 USD based on a monthly cost of \$15,380 USD.
- Maintained the ActiveAdmin interface used by the internal team to provide support to our user base of 250,000 clinicians.
- Maintained compliance with state privacy laws by redesigning the DataGrail cookies request banner in under 2 days.
- Developed under LaunchDarkly feature flags to gradually increase customer visibility of new features.
- Joined the Identity, Trust & Platform squad, where most of the ownerless work ends up!

## EDUCATION

### Instituto Tecnológico y de Estudios Superiores de Monterrey 🌐📍

B.S. Degree in Computer Science and Technology Engineering JavaScript, Java, GCP, Python, C, Spring, Git, IntelliJ, VSCode

- Made use of JavaScript to develop miscellaneous projects e.g. an e-commerce platform with a shopping cart made in Angular, an online learning platform made in React, a Google search bar replica, etc.
- Made use of Java to develop miscellaneous projects e.g. a visual reversi game, a contact information application, an events calendar, three dimensional environments, etc.
- Made use of GCP to host miscellaneous projects e.g. a landing page with user login, the e-commerce platform made in Angular, a batch job runner, etc.
- Made use of Python to develop miscellaneous projects e.g. a sentiment analysis machine learning platform, various file management utilities, a test-driven optimized sudoku solver, etc.
- Made use of C to develop miscellaneous projects e.g. a symbol table and a compiler with Flex and Bison, a binary search tree utility, etc.
